- Whether it's ending cable clutter or gaining customizable hardware control, ATEN makes you a certified expert during two advanced training sessions.
- The ATEN Talks: fast-paced information sharing in short but sweet keynote sessions.
- A booth tour guarantees you a complete overview of the ATEN solutions.
- More than 40 years of experience in the AV and IT industry will be celebrated.

ATEN will once again offer a variety of activities over the course of ISE 2020 (11-14 February). Next to the daily training sessions at the ATEN booth (Hall 8, Booth K200), two in-depth certification courses will be organised. The first session, on Wednesday the 12th of February, will revolve around ATEN's VK-series where centralized and customizable hardware control are key. The second certification course will provide a deeper insight into HDBaseT and its five components on the 13th of February. Visit www.aten.com/ise2020 for more information and register for the session(s) of your choice.

This year at ISE2020, the brand-new ATEN Talks will be premiered. During various keynote sessions, in-house experts as well as ATEN partners will share their expertise on a wide range of topics. More than ten speakers will share their insights over the course of four days. The modern-day control room, the meeting room of the future and efficient AV distribution are just some of the topics that will be discussed. Follow the link above for more information on the different topics and speakers.

Discovering ATEN solutions is always more interesting under the guidance of a trained expert. A daily ATEN booth tour is hosted at ISE 2020 to ensure a comprehensive overview of what to expect in 2020. From a triple display KVM switch (CS1964) to an AV mixer for live streaming (UC9020), multiple products will be available for live demonstrations. This allows visitors to get hands-on with the latest KVM and AV products.

More than 40 years of experience in AV and IT calls for a celebration. For the second consecutive year, ATEN will be hosting a booth party on Wednesday at ISE. The atmosphere of such an event is an ideal opportunity to connect with the ATEN Team and all its partners in a more informal way. Registration in advance is key, so make sure to get in touch with one of the ATEN representatives.

About ATEN

ATEN Infotech is the European subsidiary of ATEN International Co., Ltd (TWSE: 6277). For over 40 years, ATEN has been the leading provider of hardware connectivity and management solutions, offering integrated IT Infrastructure Management, Professional Audio/Video, and Energy Intelligence.
